BOM Radar Image	<a href="http://www.bom.gov.au/australia/radar/">http://www.bom.gov.au/australia/radar/</a>	After selecting the local radar select 24hr rainfall image if it is available in the loop options above the map. Also tick the Map features River catchment, Locations and Lakes and Major Rivers in the right hand column. The will then show you the mm of rain that fell over the area by day for the last 7 days. This is helpful where there are not many rain or river level gauges.
BOM 7 day streamflow Forecast	<a href="http://www.bom.gov.au/water/7daystreamflow">http://www.bom.gov.au/water/7daystreamflow</a>	BOM uses rain forecast, current rain gauges, river levels and other data to model the 7 day stream flow forecast and shows it as MLD readings for the last 4 days and next 7 days. This is not done for all rivers as they need the more rain gauge data they have the more accurate the forecast
